

THE 2026 LIGHTING CATALOG

Everything we *hang*.

Every piece we offer, and how it comes together in each package. We own every light: we design the display, install it, look after it all season, then take it down and store it after the holidays.

THE LIGHT

One standard, *three colors.*

Commercial-grade LED on heavy-gauge wire, built for a Midwest winter. Mix colors by zone: warm white on the house, color in the trees.

Warm white

The house standard. Soft, candle-toned light that suits brick, stone and painted trim.

Classic color

Red, green, blue and amber in a steady pattern. Best in the trees and on simpler rooflines.

Cool white

Crisp and modern, made for contemporary lines.
